

Sales Performance Dashboard

Lizeth Delgado

Description

This dashboard shows an overview of sales performance, including revenue trends, profit, and regional results. It focuses on key metrics such as total sales, total profit, number of orders, and profit margin, along with year-over-year comparisons to understand growth. The goal is to make the data easier to understand and help identify patterns, top-performing products, and areas with better performance.

Key Insights

- Sales increased significantly year-over-year
- Technology is the top-performing category
- The West region generates the highest sales
- Profitability varies across categories
- Growth is consistent across all KPIs
